India General Election Results 2024

Power BI Dashboard & Data Analysis

Project Overview

This is a learning project focused on analyzing the results of the 2024 Indian General Election using Power BI. The dashboard explores seat distribution, alliance performance, state-level political patterns, constituency results, candidate performance, and vote counts.

Project Objectives

- Explore the overall distribution of seats among the NDA, I.N.D.I.A. alliance, and other parties.
- Compare election outcomes across states and constituencies.
- Analyze candidate-level results, including EVM and postal votes.
- Understand victory margins and regional political patterns.
- Practice data analysis and dashboard development using Power BI.

Dashboard Pages

- **Landing Page:** The entry page for navigating the report.
- **Overview Analysis:** A high-level summary of the election results and seat distribution.
- **State Demographic Analysis:** A state-focused view of election results and related demographic patterns.
- **Political Landscape by State:** A comparison of political performance across states.
- **Constituency Analysis:** A deeper look at constituency-level outcomes, candidates, votes, and victory margins.
- **Details Grid:** A detailed grid/table view of election result data.

Tools & Data

- Power BI — dashboard development and data visualization
- Dataset source — Kaggle (add the exact dataset URL for attribution)
- Project type — personal learning project

Key Findings

- The NDA won approximately 54% of the total seats, based on the project's current findings.
- The NDA showed strong performance in Madhya Pradesh and Himachal Pradesh.
- The NDA won zero seats in Tamil Nadu.

Note: These findings are stated as recorded for this learning project. Verify the calculations against the dataset and define the seat denominator clearly before presenting them as final results.

Repository Structure

```
india-general-election-analysis-2024/
├── Report.pbix
├── Data/
├── SQL/
├── Documentation/
└── README.md
```

How to Explore the Project

1. Download or clone the repository.
2. Open the Power BI report file (Report.pbix) in Power BI Desktop.
3. Use the report pages and filters to explore election results at different levels.
4. Review the supporting data and SQL files, if included in the repository.

Data Attribution

The dataset used for this project was sourced from Kaggle. Add the original dataset name, creator, and URL here to provide proper attribution and make the data source reproducible.
